

Editorial Preface

It is my great pleasure to introduce the first special publication of the Jordan Journal of Earth and Environmental Sciences (JJEES), dealing with eight selected papers that have been presented in the International Conference on Materials in Jordan.

I have read the papers of this issue with lively interest, with real enjoyment, and with close attention and appreciation of its accurate and discreet coverage of materials in Jordan.

This special publication is intended to help the participants as well as colleagues in material sciences of different disciplines to work together on their common or interrelated problems and to use their work ideas and information presented at the conference. This document will be useful to many materials scientists.

Without the warm support and patient assistance of the editorial board this work could not have been completed. They cheerfully helped me in this publication.

Many special thanks go to MCPD. Osama Al-Shareet from the Computer Center, who prepared this special issue for the printer with great skill.

Editor-in-Chief,
JJEES,
Professor Abdul Rahim A. Hamdan,
Dept. of Earth and Environmental Sciences,
The Hashemite University,
Zarqa, Jordan.
